

Worksheet seed bombs

What do you need?

- 4 tablespoons chamotte clay
- 5 tablespoons potting soil
- 50 ml water
- Flowerseeds
- A bowl
- A spoon

Step 1

Fill the bowl with chunks of clay, potting soil and the seeds and stir.

Make sure everything is well mixed.

Step 2

When everything is mixed well, you can add water. Add little bits of water each time.

Don't make it too wet!

Step 3

Now the mixture is ready. Roll small balls.

You can make about ten balls with this mixture.

Tip

If you are not going to use them right away, store them in an empty egg carton

Step 4

All done!

Throw the flower bombs in sunny, barren spots. The best time to do this is when it's raining. (Or water them immediately when you throw them somewhere)
