

Worksheet Making Fireflies

What do you need?

- A small empty plastic bottle (rinse well)
- Markers or coloured pencils
- Glow sticks
- Pipe cleaners
- Glue eyes
- Glue (or glue gun if you have an adult assistant!)

Step 1

Print out this worksheet and the second page with the wings separate. Fold the sheet in half and cut out the wings. Decorate the wings.

Step 2

Twist pipe cleaners around the bottle as legs. Most insects have 6 legs. For this, you will need 3 pipe cleaners.

You can give your firefly feelers by twisting a pipe cleaner around the bottle neck.

Step 3

Time to glue!
Stick the wings on the back of your firefly. Glue two eyes on the bottle cap.

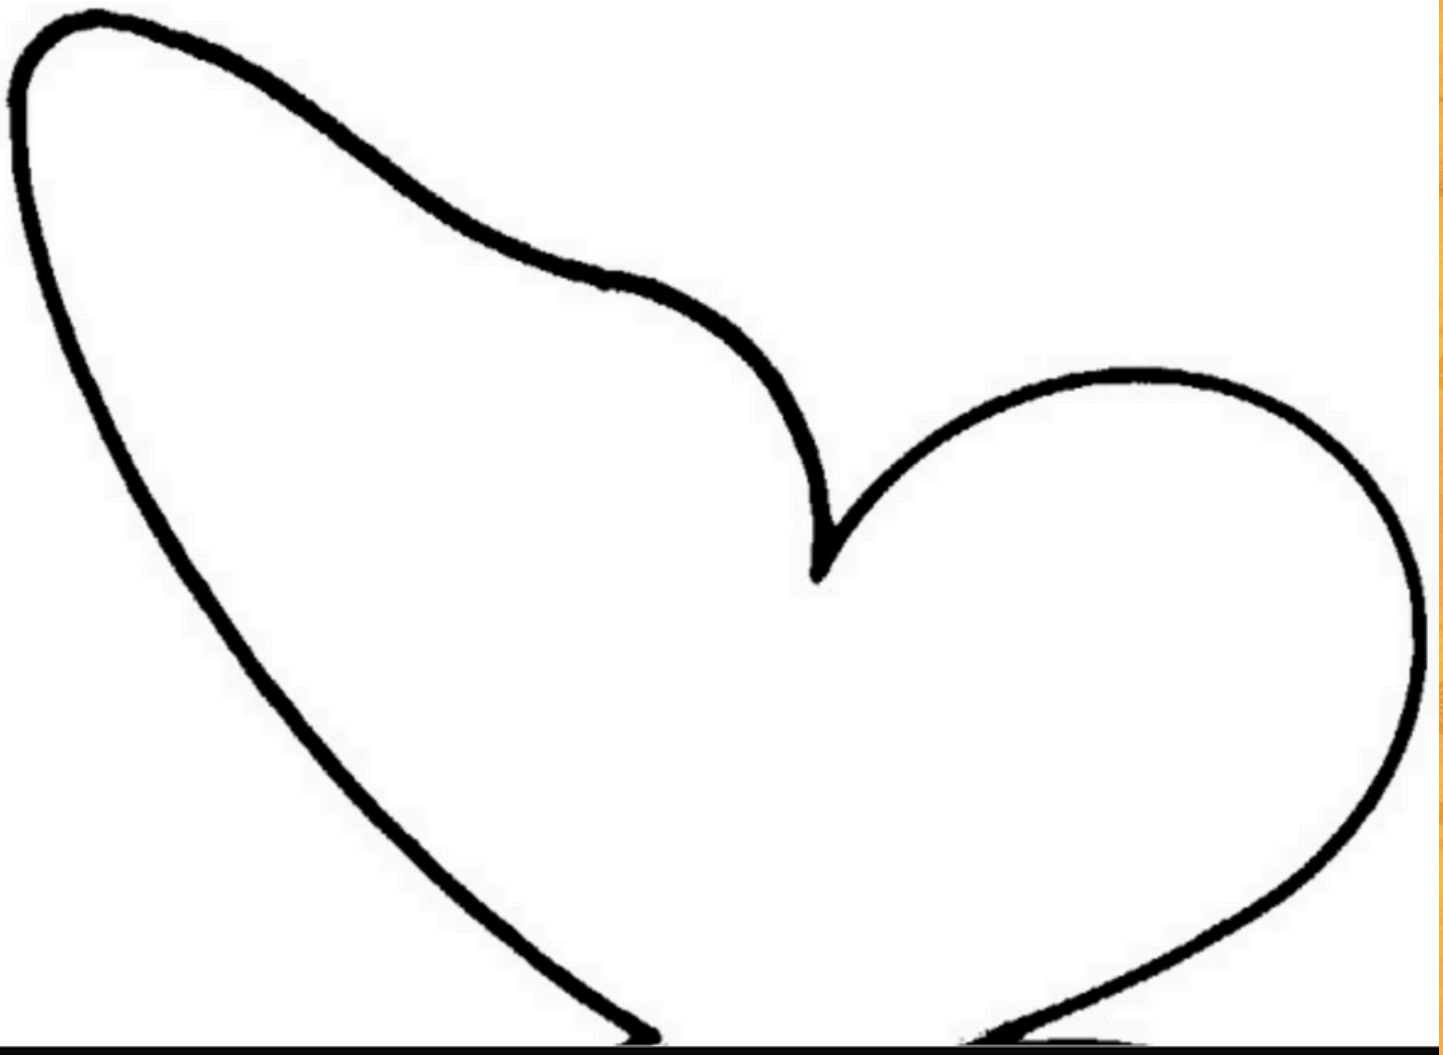

You're almost done!

Step 4

Wait until it is a little dark outside and break the glowsticks so they give off light.
Put a few glowsticks in your bottle and twist the cap on.

Your firefly is ready!

Fold the sheet in half and cut out
the wings. Then you can decorate
the wings.
