

Cut and colour sheet

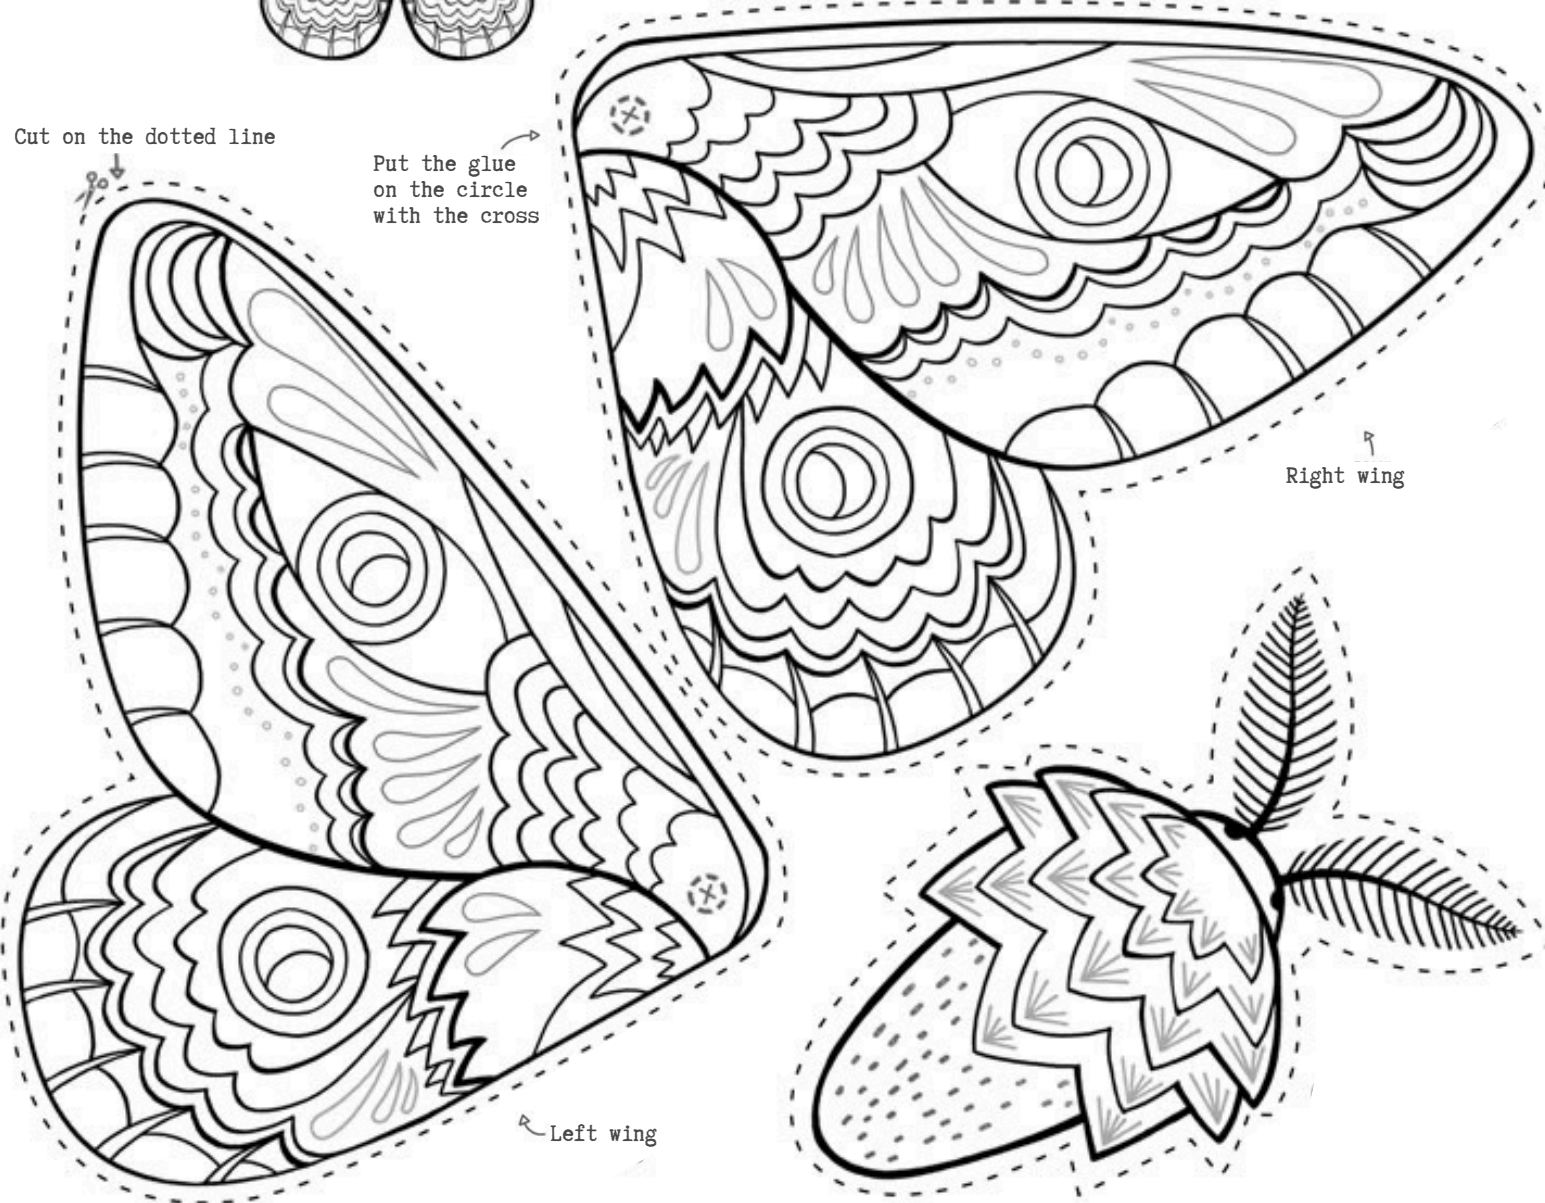

what do you need?

- Coloured pencils or markers
- Scissors
- Glue

Cut on the dotted line

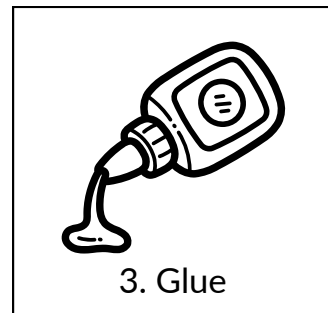

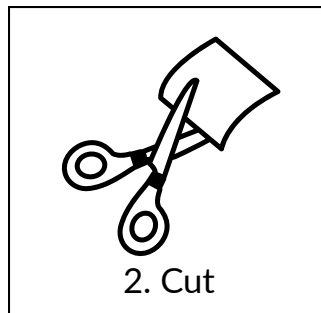

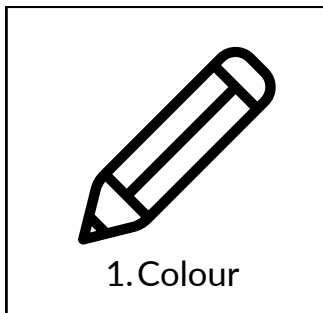

Put the glue on the circle with the cross

Right wing

Left wing

Here's what you do:

Check the back for an extra fun tip!

Or use split pins!

- Make a hole with a hole punch on the cross instead of glue.
- Note! You will then also have to make a hole in the moth's body.
- Put the body on top of the wings and make sure the holes are on top of each other. Insert the cotter pin so that the rounded side is on top of the body. Now the moth can move its wing!
